FEEDING FOR EFFICIENT PRODUCTION

Product	Crude Protein %	ME (MJ/kg DM)	UFV	Coarse Ration	Pellet
Super 18	18	11.1	0.94	Х	*
Supreme 18	18	11.2	0.96	Х	*

Supplementation pre lambing is extremely important to drive ewe milk yield and quality in early lactation. Feeding concentrates of high protein content in late gestation will aid growth of the lamb(s) and aid in meeting the nutritional requirements of the ewe.
